

# 12.2 Overview of output results

**Table 51: Interference criteria summary for various victim systems**

<b>Victim system</b>	<b>Intereference criteria</b>
Generic module (i.e. non CDMA/OFDMA)	Probability of interference based on $C/I$ , $C/(I+N)$ , $(N+I)/N$ , $I/N$
CDMA	Capacity loss (i.e. number of voice users being dropped)
OFDMA	Bitrate loss (i.e. number of bit rate lost compared to a non interfered victim network)
