

9.2 OFDMA system tab

- [Introduction](#)

Introduction

Whether you want to simulate OFDMA UL or OFDMA DL, you can import

from the system library (Figure 199 – (a)), the cellular system you want (Figure 199 – (b)). You can also export

the characteristics of your OFDMA network to the library for later reuse.

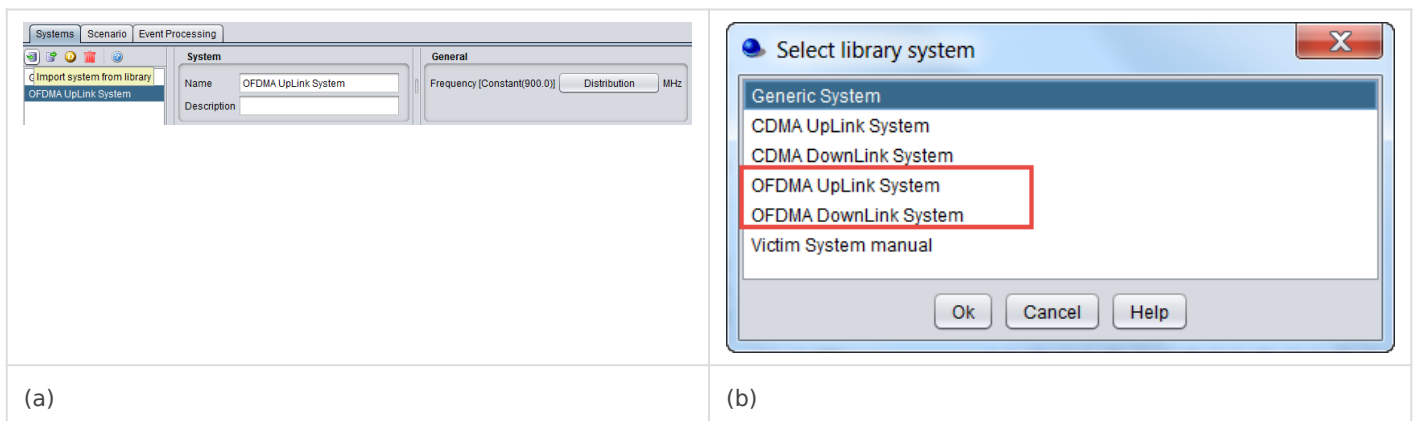

Figure 199: Selection of a OFDMA cellular network from the system library
