

Group Question

Group question is a tool used for asking simple questions in a working group / project team. You could ask to find a common date for next meeting, or if you want to know who will attend a social event in a meeting.

- [Access Group Question](#)

Access Group Question

The group question, are accessible for members of a working group / project team. This means that guests in groups cannot see the group questions.

You access the group question in two ways, one is from your profile page - a tab for group questions will show you all the questions from any group you are a member of, both the active questions, and the finished questions.

My Start page	My Profile	My Groups	My meetings	Questionnaires	Group Questions	My notifications	My Email Groups	
---------------	------------	-----------	-------------	----------------	-----------------	------------------	-----------------	--

GROUP QUESTIONS

You can also find group questions for the specific groups in the frontpage of the group, if the function is activated in that group, a tab will show you group questions - but only for that specific group:

ECC → ECC → WG SE								
Working Group Spectrum Engineering								
Group info ▼	Meeting documents	Meeting calendar	Group Question	Forum				

If the tab is not there, it simply means that the function is not active in this group. If you think it could be useful, please contact the chair of ECO contact for that group.
