

Old document archive

The CEPT portal received a major transformation in 2011, where it unfortunately was necessary to move the document library from that solution to a new frontend, it was not possible to integrate this in the new system.

Archive from before 2011 is still available through the meeting documents, via a link on the page.

You will be taken to a page where you can browse the documents in the structure they were stored under at the time, be mindful that this can mean that names of groups and project teams can have changed.

Some documents are locked from access, if you need any of these, contact the office, and we will provide access after a review process.

This page gives access to all public documents. For access to documents restricted to group members, please go to the corresponding group meeting document area.

MEETING DOCUMENTS

[Archive \(Docs up until 1 July 2011\)\(except CERP\)](#)
