Release History

We try our best to test all functionalities of the MeetingHub before we release the software, however sometimes details can slip our attention. If you find any error or misunderstanding in the system, please report to helpdesk@eco.cept.org and be as descriptive as possible in your error report.

Date and version	Notes
V.1.0 01.07.2021	initial release.
V1.1 22.10.2021	•Scroll to last message in Chat now works, in all browsers •Notifications will indicate action in MeetingHub (will tell what is happening, asking for floor, entering MeetingHub etc.) •Representing when “invited by chairman” now shows the correct information. •A new link to indicate “Reply privately” is now shown in each chat message – this is still possible by clicking the name of the sender in the chat message. •Template function in Live Question – you can now save a LQ as a template for future quick creation of repetitive LQ. •Link to manual pages are now available in the top right corner menu. •Corrected spelling mistake in "Submitted" text •Template Live Question functionality, including admin management function •Unread number in chat is now cleared when all messages shown •Representing info now updated for all users when accessing the MeetingHub

NEW DESIGN Release 1 Restart version. 28.10.2022	Major rewrite of MH. •New overall design •MeetingHub and GoTo in one window •Dynamic menus (links access during meeting etc.) •Breakout sessions •New Raise Hand options (visibility and management) •Live Questions functions to appoint participants
Release 2 21.04.2023	Minor changes and error corrections • Redesign Parallel meetings flow • Require participation data of meetings without registration • Include more registration information from the CEPT portal (HoD, Virtual/Physical) • Rework mobile version of MH
Release 3 03.07.2023	Minor changes and error corrections • Mobile access icon disappears on Firefox - moved to “Burgermenu” When entering parallel session - use userinfo from main meeting • Removed participants is not removed • Option for participants in open meetings to edit their participation data • Activated LQ must be on top of the list • Exported results for LQ must contain name and representing when non-anonymous LQ • Simplify chat unread indicator • [TEST] Option to user other Video Conference tool than G2M (not to be used in production yet) • + a number of backend errors corrected
